Add the following new claims:

Sub C  
--21. A process for forming a composition, comprising:

contacting reactants at concentrations and under conditions sufficient to provide a reaction product of substantially any predetermined combination of water solution stable macronutrients and/or micronutrients of substantially any concentration and/or concentrations.

22.. The process of claim 21, wherein said product further comprising:

a plant or cell promoting effective amount of solution stable  $\text{Ca}^{++}$  moieties;

a plant or cell promoting effective amount of solution stable  $\text{S}^{6+}$  moieties;

a plant or cell promoting effective amount of solution stable  $\text{Mg}^{++}$  moieties; and,

a plant or cell promoting effective amount of solution stable  $\text{N}^{3-}$  moieties.

23. The process of claim 22, wherein said concentrations and/or said conditions further comprise an acidic environment.

24. The process of claim 22, wherein the solution stable moieties are formed by reacting effective amounts of:

at least one member selected from the group consisting of:
